Twenty bottles. One wardrobe. One decision system — now organized around how you'll actually use it: framework first, decision tools next, full catalog after, deep reference last.

PART I

The Collection at a Glance

The collection now has four major strengths: luxury warmth, professional cleanliness, hot-weather freshness, and evening presence. Twenty distinct fragrances — Rain Tea/Tea Storm counted as one, YSL Y and YSL MYSLF kept separate.

COLLECTION DNA

Clean • Luxurious • Masculine • Sensual • Expressive

The tendency is toward fragrances with a recognizable personality rather than anonymous, purely functional scents — a wardrobe that moves from quiet tea and citrus to vanilla, tobacco, amber, tropical fruit, and darker evening textures.

CATEGORY	SCORE
Overall quality	9.3 / 10
Variety	9.5 / 10
Luxury / niche character	9.5 / 10
Hot-weather coverage	9 / 10
Cold-weather coverage	10 / 10
Professional coverage	9 / 10
Date-night coverage	10 / 10
Formal coverage	9.5 / 10
Casual coverage	9 / 10
Overall wardrobe completeness	9.5 / 10

THE CONCLUSION

You do not need another fragrance simply to make the collection feel complete. Your next level is selection discipline — knowing exactly why you are reaching for each bottle.

PART II

The Five Wardrobes

A — CLEAN / PROFESSIONAL

Icon · Sedley · YSL Y · MYSLF · Wulong Cha · Rain Tea · Blue Talisman — daytime, work, client meetings, heat, and situations where cleanliness and approachability matter.

B — REFINED LUXURY

Althair · Layton · Pegasus · 40 Knots — polished presence, smart casual clothing, elevated environments, moments where the fragrance should feel expensive.

C — DARK & SENSUAL

Herod · Naxos · Armani Code Parfum · Tobacco RWA — evening, dates, intimate environments, cooler weather, richer styling.

D — SOCIAL / ATTENTION

1 Million · God of Fire · Layton · Black XS L'Excès — nightlife and social situations where stronger projection and personality are acceptable.

E — ARTISTIC / UNUSUAL

Rain Tea · Wulong Cha · Pegasus · 40 Knots · God of Fire — creative environments, fashion contexts, moments where character matters more than conventional pleasantness.

NOTE

Layton, Rain Tea, Pegasus, and God of Fire each sit in two wardrobes — versatility across clusters is itself part of their value.

PART III

Fragrance-by-Fragrance Field Guide

Black XS L'Excès for Him	Dark youthful sweetness	Casual · nightlife
YSL MYSLF	Contemporary clean woody-floral masculinity	Everyday · dates · modern professional

Reading the Field Guide

Twenty identities, twenty territories — but the table above is a map, not a decision. Three patterns worth noticing:

THE CLEAN CLUSTER IS LARGER THAN IT LOOKS

Icon, YSL Y, MYSLF, Wulong Cha, Sedley, Rain Tea, and Blue Talisman all read "clean" at some level — but each earns a different room. Y and MYSLF are the most contemporary; Icon is the most tailored; Wulong Cha and Rain Tea are the quietest; Sedley is the most utilitarian in heat; Blue Talisman is the most luminous.

THE DARK CLUSTER IS SMALLER AND MORE DELIBERATE

Herod, Naxos, Armani Code Parfum, and Tobacco RWA each occupy a distinct register of "dark" — luxury tobacco, honeyed grandeur, smooth sensuality, and casual gourmand warmth respectively. None of the four is redundant with another.

THE STATEMENT CLUSTER IS WHERE RESTRAINT MATTERS MOST

1 Million, God of Fire, Layton (at high dosage), and Black XS L'Excès can each announce themselves. This is precisely the cluster where the rule of restraint in Part VII does the most work.

PART IV

Field Notes: The Key Bottles

PDM Layton — The All-Rounder

Your bridge fragrance. It can move from smart casual to evening and from moderate weather to cooler conditions. Reach for it when you want confidence without becoming overly formal.

Nishane Wulong Cha — Hot-Weather Sophistication

The collection's refined tea/citrus counterweight to the sweeter bottles. A clean, intellectual, composed option for heat and daytime.

PDM Althair — Luxury Sensuality

A polished vanilla-amber choice. Best when you want warmth, richness, and a premium impression without relying on aggressive nightlife energy.

PDM Herod — Dark Sophistication

The tobacco axis of the wardrobe. It creates a mature evening identity and is particularly useful in cooler weather.

Dunhill Icon — Professional Elegance

A tailored-feeling option that bridges classic masculinity and modern cleanliness. Especially useful for business, client meetings, and smart casual clothing.

WHY THESE FIVE

They preserve the maximum range if you ever need to travel with a minimal wardrobe.

PART V

The Core Five

BOTTLE	JOB	WHEN IT EARNS THE SLOT
PDM Layton	All-rounder	When you need one bottle to cover several situations
Nishane Wulong Cha	Hot-weather sophistication	Heat, daytime, refined casual, creative settings
PDM Althaïr	Luxury sensuality	Dates, evening, premium smart-casual moments
PDM Herod	Dark sophistication	Cool evenings, formal nights, mature presence
Dunhill Icon	Professional elegance	Work, meetings, tailored daytime situations

If your wardrobe ever becomes travel-only, these five preserve the largest combination of climate, occasion, and personality coverage.

PART VI

Temperature & Weather System

WEATHER	PRIORITY CHOICES	WHY
30°C+	Wulong Cha · Sedley · Rain Tea · YSL Y · Icon · Blue Talisman	Freshness, tea, citrus, airy musks, and cleaner woods reduce the risk of becoming heavy.
20–30°C	Icon · YSL Y · MYSLF · Blue Talisman · Sedley · Layton · Althair · Le Beau	The largest operating zone; almost the entire wardrobe can work with controlled spraying.
15–20°C	Althair · Layton · Code Parfum · Herod · Naxos · Pegasus · 40 Knots	Warmth and texture become easier to wear without overwhelming the environment.
Below 15°C	Naxos · Herod · Althair · Layton · Pegasus · 1 Million · Black XS · Tobacco RWA	Dense vanilla, tobacco, amber, spice, and gourmand structures benefit from cold air.

THE CAIRO PRINCIPLE

In hot weather, heat can amplify evaporation, projection, and perceived sweetness. A fragrance that feels elegant at 18°C can become excessive at 35°C — use lighter compositions and fewer sprays as temperature rises.

PART VII

Occasion & Dress System

SITUATION	FIRST CHOICES	DESIRED IMPRESSION
Professional / office	Icon · YSL Y · MYSLF · Wulong Cha	Clean · competent · approachable
Client meeting	Icon · Wulong Cha · YSL Y	Polished · controlled · trustworthy
Smart casual	Layton · Icon · MYSLF · Althaïr	Confident · sophisticated
Date	Althaïr · Code Parfum · Layton · MYSLF · Herod	Warm · sensual · memorable
Formal evening	Herod · Naxos · Pegasus · Althaïr · 40 Knots	Elegant · mature · composed
Nightlife	1 Million · God of Fire · Layton · Black XS L'Excès	Expressive · energetic · noticeable
Creative / fashion	Wulong Cha · Rain Tea · Pegasus · 40 Knots · God of Fire	Individual · artistic · intentional
Relaxed / personal	Rain Tea · Sedley · Wulong Cha · Tobacco RWA	Comfortable · understated

RULE OF RESTRAINT

The more enclosed, formal, or professional the environment, the more controlled the fragrance should be. The more open, social, or nocturnal the environment, the more projection you can responsibly allow.

PART VIII

The Selection Decision Tree

1

WHAT IS THE WEATHER?

Hot → fresh/tea/citrus. Moderate → flexible. Cool → warm/amber/tobacco.

2

WHAT TIME IS IT?

Morning/day → cleaner. Evening → richer. Late night → stronger can be appropriate.

3

WHERE ARE YOU GOING?

Office/client space → restrained. Outdoor/social → more expressive. Intimate → sensual.

4

WHAT ARE YOU WEARING?

White shirt / tailored → Icon, Wulong Cha, YSL Y, Code Parfum. Darker evening clothing → Herod, Naxos, Althair.

5

WHAT DO YOU WANT TO COMMUNICATE?

Clean → YSL Y. Sophisticated → Icon/Wulong Cha. Luxurious → Althair. Seductive → Layton/Code. Mature → Herod/Naxos.

6

HOW MUCH PROJECTION IS APPROPRIATE?

Small room → fewer sprays. Open space → moderate. Nightlife → stronger, but still controlled.

THE ONE-SENTENCE SYSTEM

Choose the fragrance that best matches the weather + time + environment + clothing + desired impression — then wear slightly less than your first instinct.

Application & Performance

Full technique lives in The Application Codex. The essentials, restated: the objective is not maximum spray count — it is maximum useful presence: longevity, a controlled scent trail, and a clear scent bubble without overwhelming other people.

FOUNDATION

Apply to clean, dry skin. If your skin is very dry, an unscented moisturizer can help reduce rapid evaporation. Avoid rubbing the fragrance into the skin immediately after spraying; let it settle naturally.

PLACEMENT

Prioritize comfortable warm areas such as the sides of the neck and upper chest. Clothing can hold scent longer, but test delicate fabrics first.

SPRAY PHILOSOPHY

Start lower than your instinct. You can add fragrance; you cannot remove a cloud once it is in the room. Dense fragrances such as Herod, Naxos, Althair, 1 Million, or Layton deserve extra restraint in heat.

AVOID OLFACTORY FATIGUE

Do not repeatedly spray because you stopped smelling yourself. Your nose adapts. Ask whether the fragrance is actually disappearing or whether your perception has simply become less sensitive.

ENVIRONMENT RULE

Small indoor spaces, offices, cars, classrooms, prayer spaces, and client environments require a smaller scent footprint than outdoor gatherings or nightlife.

PART XI

Overlap, Rotation & Acquisition Discipline

CLUSTER	EXAMPLES	WHAT MAKES EACH WORTH KEEPING
Sweet vanilla / amber	Althair · Layton · Code Parfum	Different levels of spice, fruit, creaminess, and sensuality
Tobacco / warmth	Herod · Naxos · Tobacco RWA	Luxury tobacco vs. honeyed tobacco vs. casual gourmand
Fresh / clean	Sedley · YSL Y · MYSLF · Icon	Aquatic/citrus vs. aromatic vs. woody-floral vs. polished citrus
Statement sweet	1 Million · God of Fire · Black XS	Different degrees of youthfulness, fruitiness, and social intensity

The collection's greatest concentration is still around vanilla + amber + woods + tobacco + sweetness. That is not a flaw; it is a recognizable preference. It simply means future purchases should solve a real wardrobe gap rather than duplicate an existing emotional effect.

ACQUISITION RULE

Do not buy another sweet vanilla/tobacco/amber fragrance unless it provides a clearly different role. A future addition should ideally introduce a new material, climate function, formality level, or artistic direction.

Potential future contrasts: a very dry green/woody fragrance, a refined iris/powdery formal scent, a minimalist skin scent, or a distinctive dry aromatic/green composition — each would add more contrast than another sweet amber.

WHAT YOU'LL OVERUSE — LAYTON

Precisely because it works so well. Wear it constantly and it stops being a wardrobe — it becomes one fragrance plus nineteen bottles. Suggested main rotation: Sedley → Y → Icon → Rain Tea → Layton, saving the rest for moments their character actually adds something.

PART XII

Individual Profiles — The Core Thirteen

The original working rotation, with full spray protocols and placement — the deepest layer of detail in this codex.

Dunhill Icon

"THE TAILORED SUIT" · NEROLI, BERGAMOT, PEPPER, LAVENDER, CARDAMOM, VETIVER, IRIS, LEATHER, OUD

Best: 18–29°C — office, client meetings, smart-casual, tailored looks, spring/autumn, AC interiors (acceptable to 33°C indoors). **Avoid:** 38°C heat, gym, club, romantic dates.

Personality: elegant, mature, understated, intelligent. **Sprays:** hot 2–3 · mild 3–4 · cold 4 · office 2–3. **Placement:** chest + 1–2 sides/back of neck.

Rain Tea / Tea Storm

"THE QUIET LUXURY SIGNATURE" · CHAMOMILE, CHRYSANTHEMUM, ACACIA, WHITE TEA, RAIN NOTES, HONEY, BARLEY, LONGAN

An aromatic tea fragrance that never tries to dominate a room. **Best:** 20–31°C — mornings, quiet cafés, creative work, galleries, linen, overcast or AC calm. **Avoid:** clubs, weddings, loud parties, moments you want attention. **Personality:** intellectual, artistic, calm. **Sprays:** hot 3–4 · office 3 · outdoor 4. **Placement:** sides of neck + chest — don't bury under clothing.

Althair

"THE POLISHED SEDUCER" · VANILLA, PRALINE, ORANGE BLOSSOM, CINNAMON/CARDAMOM, WOODS

Luxury sweetness without looking juvenile — not merely a winter fragrance. **Best:** 17–27°C — evenings, dates, luxury dinners, fashion events, jackets (acceptable to 30°C at night indoors). **Avoid:** 32°C daytime outdoors — turns syrupy. **Personality:** warm, seductive, charismatic. **Sprays:** hot 1–2 · mild 3 · cold 4 · date 3–4. **Placement:** chest + back of neck + one side.

Herod

"THE VELVET JACKET" · CINNAMON, TOBACCO, INCENSE, VANILLA, MUSK, CEDAR

The darkest traditional masculine in the collection. **Best:** 10–21°C — winter nights, dinners, intimate dates, dark tailoring, leather, wool, cashmere. **Avoid:** Cairo summer, hot offices, small poorly ventilated rooms. **Personality:** dark, mature, sensual, sophisticated. **Sprays:** mild 2–3 · cold 3–4 · date 3. **Placement:** chest + back of neck.

Layton

"THE KING OF THE WARDROBE" · APPLE, BERGAMOT, CARDAMOM → LAVENDER/VIOLET/GERANIUM → PATCHOULI/VANILLA/PRALINE/WOODS

The most important fragrance in the collection — moves between casual, romantic, luxurious and formal better than almost anything else you own. **Best:** 14–27°C — day or evening, dates, dinners, events, smart casual to suits (acceptable to 30°C at night, 2 sprays). **Avoid:** 32°C daytime. **Personality:** confident, luxurious, polished, seductive. **Sprays:** hot 1–2 · mild 3 · cold 4 · date 3–4.

Pegasus

"THE METALLIC ARISTOCRAT" · ALMOND, BERGAMOT, ANISE, VIOLET LEAF/ORANGE BLOSSOM, AMBROX/VANILLA/SANDALWOOD

Less universally wearable than Layton, but more distinctive. **Best:** 13–25°C — evenings, fashion events, formal-casual, black/grey tailoring, night photography. **Avoid:** very hot weather, tiny offices, subtlety-first romantic moments. **Personality:** cold elegance, metallic, powerful. **Sprays:** mild 3 · cold 4 · office 2 · night 3–4.

Sedley

"THE CAIRO WEAPON" · MINT, CITRUS, LAVANDIN, PINE, SANDALWOOD, AMBROX, WHITE MUSKS

Arguably the most useful bottle in the entire collection for Cairo — 35°C is still usable, and that is where Sedley earns its place. **Best:** 20–35°C — mornings, offices, driving, outdoor daytime, summer, studios, client meetings. **Personality:** clean, energetic, fresh, polished. **Sprays:** 30–35°C: 3–4 · 25–30°C: 4 · 20–25°C: 4–5 · office 3. **Placement:** sides of neck + chest.

1 Million

"THE SOCIAL PERFORMER" · CITRUS/MINT, CINNAMON, ROSE, AMBER, LEATHER, PATCHOULI

Not the sophisticated choice — it's the social weapon. **Best:** 15–27°C — nights, parties, clubs, casual dates, birthdays, statement clothing. **Avoid:** interviews, business meetings, hot offices, conservative formal settings. **Personality:** confident, flashy, playful. **Sprays:** mild 3 · cold 4 · night out 3–4 · date 2–3.

God of Fire

"THE EXOTIC STATEMENT" · MANGO, GINGER, LEMON, PINK PEPPER → WOODS, JASMINE, OUD, MUSK, AMBER

A tropical luxury fragrance — very good for Cairo nights. **Best:** 20–31°C — evenings, resorts, summer dinners, outdoor events, linen, open collar. **Avoid:** extreme midday heat.

Personality: exotic, artistic, sensual, expensive. **Sprays:** hot 2 · mild 3 · outdoor 3 · date 3.

40 Knots

"THE YACHT" · WOODY, MARINE, SALTY, GREEN, AROMATIC

Not a generic aquatic — a dense marine luxury scent. **Best:** 18–31°C — outdoor evenings, summer, coastal aesthetics, linen, smart casual, social events. **Avoid:** tiny offices in hot weather. **Personality:** maritime, wealthy, relaxed, unconventional. **Sprays:** hot 2–3 · mild 3 · outdoor 3 · evening 3.

Naxos

"THE GRAND ENTRANCE" · CITRUS, LAVENDER, INCENSE, JASMINE, HONEY, CINNAMON, VANILLA, TOBACCO, TONKA

Rich and ornate — the highest luxury-impact fragrance in the collection. **Best:** 10–22°C — weddings, galas, formal dinners, important celebrations, velvet/wool/suits. **Avoid:** Cairo summer daytime, offices, small rooms, casual errands. **Personality:** opulent, sophisticated, magnetic, grand. **Sprays:** mild 2–3 · cold 3 · wedding 2–3 — Naxos does not need 5–6 sprays.

YSL Y EDP

"THE PROFESSIONAL BLUE" · FRESH SAGE, CRISP GERANIUM, SENSUAL WOODS

Sophisticated and masculine by design. **Best:** 18–32°C — offices, interviews, client meetings, presentations, white shirts (acceptable to 35°C with 2 sprays). **Personality:** clean, competent, ambitious, approachable. **Sprays:** hot 2–3 · mild 3–4 · interview 2 · client 2–3.

Rich Warm Addictive (Zara Tobacco RWA)

"THE COZY LOUNGE" · RUM, WHITE PEONY, BOURBON VANILLA

Best: 10–20°C — home, cafés, casual evenings, intimate dates, movies with friends. **Avoid:** Cairo summer, offices, interviews, formal weddings. **Personality:** cozy, warm, sensual, approachable. **Sprays:** mild 3 · cold 4 · date 3 · home 3–4.

PART XIII

Individual Profiles — The New Seven

Recent additions, mapped by identity, wardrobe cluster, and stated territory. Precise spray counts and temperature ranges for this group aren't yet part of the record — treat these as directional until tested the way the core thirteen have been.

Nishane Wulong Cha

REFINED CITRUS/TEA FRESHNESS

Territory: hot weather · daytime · sophisticated. **Wardrobes:** Clean/Professional, Artistic/Unusual. **Weather bands:** priority pick at 30°C+ and 20–30°C. **Occasion:** office, client meetings, creative/fashion, relaxed settings. Holds a seat in the Core Five as the collection's hot-weather sophistication.

YSL MYSLF

CONTEMPORARY CLEAN WOODY-FLORAL MASCULINITY

Territory: everyday · dates · modern professional. **Wardrobe:** Clean/Professional. **Weather band:** priority pick at 20–30°C. **Occasion:** office, smart casual, date. The more contemporary counterpart to YSL Y — same clean register, softer and more floral.

Ex Nihilo Blue Talisman

LUMINOUS FRUITY-MUSKY LUXURY

Territory: day · warm weather · evening. **Wardrobe:** Clean/Professional. **Weather bands:** priority pick at both 30°C+ and 20–30°C — one of the few bottles that spans both. Not yet separately scored in the occasion system; positioned by wardrobe and climate for now.

Armani Code Parfum

SMOOTH, CLEAN SENSUALITY

Territory: date · evening · smart casual. **Wardrobe:** Dark & Sensual. **Weather band:** priority pick at 15–20°C. **Occasion:** date. In the decision tree, "seductive" routes to Layton or Code — its natural role is the smoother, more restrained alternative to Layton on a date.

JPG Le Beau Le Parfum

TROPICAL SWEET SENSUALITY

Territory: summer nights · dates · social. **Weather band:** priority pick at 20–30°C. Not yet placed in the Five Wardrobes or Occasion & Dress tables — its clearest current role is the quick-reference answer for tropical sensuality specifically.

Black XS L'Excès for Him

DARK YOUTHFUL SWEETNESS

Territory: casual · nightlife. **Wardrobe:** Social/Attention. **Weather band:** priority pick below 15°C. **Occasion:** nightlife, alongside 1 Million, God of Fire, and Layton.

Dunhill Desire for a Man

CLASSIC WARM MASCULINE STYLE

Territory: casual · cooler weather. Not yet placed in the Five Wardrobes, the Temperature & Weather System, or the Occasion & Dress System — the thinnest-documented bottle in the current collection. A reasonable next step is simply giving it a season to earn a slot in those tables.

A NOTE ON THE GAP

The new seven are documented at the level of identity and territory — the core thirteen are documented at the level of spray count and placement. That gap will close with wear, not analysis.

PART XIV

Social Distance

Four bands of reach — from a fragrance only noticed close-up, to one that can announce itself across a room. "Statement" does not mean "better": in professional environments, personal/social generally outperforms statement.

INTIMATE

Only noticeable close to you.

- Rain Tea
- RWA
- Herod, lightly sprayed
- Wulong Cha

PERSONAL

Conversation distance.

- Icon
- Sedley
- Y
- 40 Knots
- MYSLF
- Blue Talisman

SOCIAL

A noticeable personal bubble.

- Layton
- Althair
- Pegasus
- God of Fire
- 1 Million
- Armani Code Parfum
- Le Beau

STATEMENT

Can announce itself.

- Naxos
- 1 Million, oversprayed
- Pegasus, oversprayed
- Layton, at high dosage
- Black XS L'Excès

The Final Rankings Matrix — Core Thirteen

Rank (1 = best) across nine criteria — read across for a bottle's full profile, or down a column for the category leader.

FRAGRANCE	PERF.	VERSAT.	HOT	COLD	OFFICE	DATE	FORMAL	COMPL.	SOPHIST.

RWA	12	13	12	5	13	12	13	12	12

Performance is not identical to projection — longevity and diffusion behave differently, which is why Naxos leads Performance but trails Hot-weather suitability.

PART XVII

Signature Scent Winners

CATEGORY	WINNER

* The core thirteen carry tested, precise ranges from repeated wear. The new seven (marked with an asterisk) show the weather band they're prioritized in rather than a tested range — treat as a starting estimate.

The Simplest Possible Rule

Hot + daytime	→ Sedley / Wulong Cha	Cool + luxurious	→ Naxos
Hot + professional	→ Y / MYSLF	Cold + intimate	→ Herod
Mild + professional	→ Icon	Warm + artistic	→ Rain Tea
Mild + everyday	→ Layton	Warm + outdoor luxury	→ 40 Knots
Mild + romantic	→ Althair	Warm + exotic/social	→ God of Fire
Night + party	→ 1 Million / Black XS	Cold + casual	→ RWA
Cool + fashion/statement	→ Pegasus	Summer night + social	→ Le Beau

The Wardrobe Principle

A fragrance is not merely something you smell like.
It is part of the atmosphere you create around yourself.

Your collection already has the range. The next stage is mastery: knowing
when to be quiet, when to be polished, and when to let the fragrance
speak.

TWENTY FRAGRANCES, ONE SYSTEM

**Choose the fragrance that best matches the weather + time +
environment + clothing + desired impression — then wear slightly less
than your first instinct.**

*That is the difference between wearing perfume and occupying a room with
perfume.*
